NANOLASERRG

NANOLASERRG is a simple Plug & Play compact multi-beam laser effect. NANOLASERRG produces hundreds of green and red points, with several operating modes such as auto-show, sound-active, manual control. The bundle contains an adaptor for truss and wall mounting, a tripod desk stand and the remote IR controller for immediate access to all functions.

- Light source: laser diode 100mW 650nm red + 50mW 532nm green
- Laser radiation class: 3R
- Beam angle: 100°
- Colour mixing: 2 colours (red, green)
- Sound mode: music activation through internal microphone and sensitivity control
- Dimensions (WxHxD): 111x85x45mm
- Weight: 0.3kg

NANOLASERRB

NANOLASERRB is a simple Plug & Play compact multi-beam laser effect. NANOLASERRB produces hundreds of blue and red points, with several operating modes as auto-show, sound-active, manual control. The bundle contains an adaptor for truss and wall mounting, a tripod desk stand and the remote IR controller for immediate access to all functions.

- Light source: laser diode 100mW 650nm red + 80mW 450nm blue
- Laser radiation class: 3R
- Beam angle: 100°
- Colour mixing: 2 colours (red, blue)
- Sound mode: music activation through internal microphone and sensitivity control
- Dimensions (WxHxD): 111x85x45mm
- Weight: 0.3kg

BATLASER600RB

BATLASER600RB is an ultra-compact RB laser allowing the user to project spectacular laser effects. Equipped with RB diodes, producing hundreds of blue and red rays, with a different pre-programmed show and remotely controlled. The independent LED control function and the music mode allows you to control the unit by music, creating spectacular laser effects. BATLASER600RB has a useful built-in lithium battery for installations without the need for cable. The package includes a bracket for mounting on truss/wall, stand tripod table and an infrared remote control for managing functions.

- Light source: laser diode 450nm/80mW blue, 650nm/100mW red
- Laser radiation class: 3R
- Beam angle: 100°
- Colour mixing: 2 colours (blue, red)
- IR: infrared sensor controlled by remote
- Battery: lithium battery
- Estimated battery life in full-mode up to: 6h
- Re-charge time: 5h/max
- Dimensions (WxHxD): 140x48x163mm
- Weight: 0.35kg

included

BATLASER200RG

BATLASER200RG is an ultra-compact RG laser allowing the user to project spectacular laser effects. Equipped with RG diodes producing hundreds of green and red rays, each with a different pre-programmed show and remotely controlled. The independent LED control function and the music mode allows you to control the unit by music, creating spectacular laser effects. BATLASER200RG has a useful built-in lithium battery for installations without the need for cable. The package includes a bracket for mounting on truss/wall, stand tripod table and an infrared remote controller for managing functions.

- Light source: laser diode 532nm/50mW green, 650nm/100mW red
- Laser radiation class: 3R
- Beam angle: 100°
- Colour mixing: 2 colours (green, red)
- Sound mode: music activation through internal microphone and sensitivity control
- Battery: lithium battery
- Estimated battery life in full-mode up to: 6h
- Re-charge time: 5h/max
- Dimensions (WxHxD): 140x48x163mm
- Weight: 0.35kg
